SUMMARY

I am a passionate front-end developer with over a year of professional experience in building diverse digital products. Skilled in technologies such as Javascript, HTML, CSS, React, Typescript, Tailwind CSS, and Next.JS, I have successfully collaborated with talented teams on significant projects, including production applications. My portfolio reflects not only my technical proficiency but also my genuine passion for software development. My approach to work combine independent decision-making with a strong emphasis on collaboration and inclusivity, positioning me as an adadaptable and promising talent in my field.

MY STACKS

- HTML
- CSS
- Tailwind CSS
- Javascript
- Typescript

- React
- Redux
- Next.JS

MY SKILLS AND PROFICIENCIES

1. **Programming Languages**: Proficient in Javascript, HTML, and CSS, with an emphasis on writing clean, efficient, and responsive code.
2. **Modern FrameWorks**: Skilled in React and Next.js, leveraging these technologies to create dynamic, user-friendly interfaces.
3. **Styling Libraries**: Expertise in Tailwind CSS, enabling the design of visually appealing and modern UI elements.
4. **Type Safety**: Experience with TypeScript, ensuring robust and error-free code through strong typing.
5. **Collaborative Development**: Proven ability to work effectively within a team, contributing to collective goals and promoting an inclusive environment.
6. **Problem-Solving**: Demonstrated ability to work autonomously, taking ownership of projects and driving them to completion.
7. **Responsive Design**: Aptitude for creating designs that adapt seamlessly across different devices and screen sizes.
8. **Version Control Systems**: Familiarity with git, supporting smooth collaboration with team members and version management.
9. **Continuous Learning**: Committed to staying up-to-date with the latest industry trends and technologies, continually seeking opportunities to enhance skills and knowledge.
10. **User-Centric Approach**: Focus on building intuitive and engaging user experiences, considering the user's needs and expectations in all design and development processes.

Folio Wallets: Junior Front-End Engineer

September 2023 - Present, Lagos, NG https://foliohq.io

- Implemented optimizations, cutting page load times by 70%, positively impacting SEO and user retention.
- Set and enforced coding standards, improving code quality and easing onboarding.
- Collaborated across teams, reducing bug reports by 25%, enhancing product stability.
- Proactively stayed current with front-end tech, integrating cutting-edge solutions into the product.

Revo Energy: Intern Front-End Engineer

June 2023 - September 2023, Lagos, NG

- Develop dynamic web applications using Next Js, TypeScript, and Tailwind CSS.
- Implement efficient state management with Redux Toolkit, ensuring smooth user experiences.
- Actively participate in project planning and sprint development, fostering efficient teamwork.
- Contribute significantly to successfully delivering various projects, showcasing adaptability in a fast-paced development environment.

Semicolon Africa: Intern Front-End Engineer

July 2022 - July 2023, Lagos, NG. https://class-client.vercel.app

- A social e-learning platform that facilitates easy learning and communication between students and tutors.

- Worked in a team of cross-functional engineers using React JS with TS, SCSS, Tailwind, and Redux for the front end.
- Worked in an Agile environment, participating in sprint planning, daily stand-ups, and retrospectives.

SIDE PROJECT

Darum https://darum.vercel.app

- Developed dynamic web applications using React JS, TypeScript, and Tailwind CSS.
- Demonstrated versatility by engaging in other company activities like planning and sprint development.

eVote: A Virtual Voting Platform

The app was designed to allow users to vote for their preferred presidential candidate online. Built with HTML, CSS with responsiveness, and Javascript that displayed real-time voting results.

Portfolio: A Personal Portfolio Platform

I developed a personal portfolio website using React,highlighting my skills, experience, and projects.

OneNote: A Note Management and Reminder Platform

I developed a note management and reminder platform called OneNote. This project aimed to provide users with a seamless and organized way to manage their notes and set reminders for important tasks. It was built with React js.

Menstrual Tracker: Tracks the Feminine Monthly Flow

This app was designed to track and calculate the feminine monthly flow. It was built with React js.

Class

A Social e-Learning Platform That Facilitates Easy Learning and Communication Between Students and Tutors.

- A team of 6 engineers building with Java Spring Boot for back-end development and React TypeScript, Tailwind, and SCSS for front-end development.
- Implemented a real-time conference call feature among tutors and students.
- Managed, reviewed, and refactored the code of other engineers.

EDUCATION

University of Lagos, Lagos, Nigeria - *Diploma*
December 2020 - September 2021

Lightfield College, Lagos, Nigeria - *SSCE*
